The City of Elgin’s emergency alert system is two-pronged.

Rave is a mobile safety alert system that Elgin Police and Fire Departments use to send notifications to subscribers, alerting them of potentially hazardous situations involving weather, streets closures and other emergencies. When you subscribe, you can determine how you receive notifications: email, text or voice messages sent to cell phones.

Smart911 allows subscribers to provide additional details of their household to a secure database accessible only to emergency responders—important details like medical and emergency contact information, property details, family members, pets and vehicles associated with the home and more.

Make sure your home is better prepared for an emergency, and subscribe today!
